Introduction

Plunux Coin (PLX) is a token designed to fund the Plunux platform and application, the first app to combine social networking, cryptocurrency, and adventure and skill-based gaming. With a fixed supply of 4 billion units, PLX cannot be created beyond its initial issuance. This white paper will detail the key aspects of PLX, its functionality, and its role within the Plunux ecosystem.

Project Overview

Plunux will make 1 billion tokens available for pre-sale, with no additional units to be created thereafter. After the pre-sale, the remaining tokens will be made available on decentralized and centralized exchanges. The Plunux app will be launched within 90 days of the pre-sale's conclusion.

Token Utility

The remaining 3 billion tokens will be integrated into the Plunux app, where they will be used for various purposes, including:

Distribution as rewards for using the social network and adventure games.

Purchasing tokens for skill-based games.

Participation in VIP rooms and tournaments with PLX token and NFT (non-fungible token) prizes tradable within the app.

Rewards and Incentives

Players and users will be rewarded based on their interaction and usage of the Plunux platform. Rewards will be distributed proportionally to the amount of activities performed, such as posts, comments, usage time, and shares. The token's valuation will also influence the amount of reward received, with higher token value resulting in lower rewards.

App Features

The Plunux app will offer various innovative features, including:

Posting videos, photos, and messages.

Artificial intelligence features.

Live streaming.

And other exclusive features of the Plunux app.

Pre-Sale Details

The initial value during the pre-sale will be \$0.0030 per PLX token.

The minimum purchase during the pre-sale will be \$6.

Plunux

Blockchain

The PLX token will be created on the BEP-20 blockchain, ensuring efficiency and security for all transactions within the Plunux ecosystem.

Initial Token Distribution

The first 500,000 users will be rewarded based on their interaction and usage of the social network. Rewards will be distributed based on the token's valuation, encouraging active and engaged participation from users from the outset.

Conclusion

Plunux Coin (PLX) is set to revolutionise the world of social media and cryptocurrencies, offering a unique platform that combines social interaction, entertainment, and financial rewards. With an innovative proposition and a range of exclusive features, the Plunux app promises to provide an unprecedented experience to its users.
